

Anti-slip pads are patterned on one side and, thanks to their adhesive function, protect furniture and shelves from scratches and dirt. Thanks to their properties, they are widely used not only in homes, but also in offices and commercial premises. EVAC foils are also used in the production of car mats.

Foils are produced using modern extrusion technology from ethylene-vinyl acetate copolymer (EVAC).

Specifications:

- Colour – natural (milky), coloured.
- Finish – smooth or designed.
- With an adhesive surface.
- Formatting: cut to size, roll.
- Weldability.
