

We offer foils and sheets made of PE, PP and TPO, produced using modern extrusion technology.

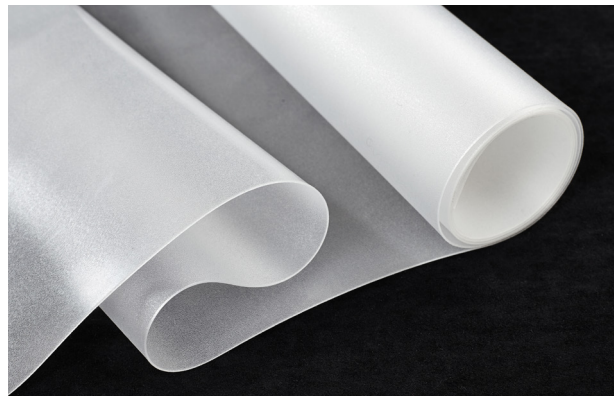

We supply products in natural, black and colored versions, both in a smooth on both sides and in a patterned on one or both sides. They are available in rolls or cut to size, always according to the required thickness, material and individual needs of customers.

We process LDPE, HDPE, PP, TPO and regranulates on our production lines.

All our products are fully recyclable and do not harm the environment.

Applications:

- Semi-finished products for thermoforming and vacuum forming.
- Car mud flap, seals (PE).
- Car mat, car trunk liner (TPO).
- Cut-outs and stiffeners for haberdashery and fastenings.
- Prevention against root growth – anti-root barrier.
- Shading foils for fence panels.
- Manufacture of seals.
- Technical application - separation layers in the packing of ignition systems, interlay under the sleepers (railway tracks), hopper chutes, pallet base material, protective interlayers used to pack technical products, etc.

Material	Thickness (mm)	Winding width (cm)	Cuts (cm)
LDPE	0.5 – 3.0	15 – 150	Max. size 150 x 300
HDPE	0.5 – 2.5		
PP	0.5 – 2.0		
TPO	0.5 – 2.5
