

The plastic mat reliably protects the floor from scratches, scuffs and stains. The board is made by extrusion of polyethylene glycol terephthalate (PET). Thanks to the material used, it is durable, easy to clean and suitable for both office and home use. The mat most often serves as a protective layer under wheeled chairs (chairmat), flower pots or food bowls in office, commercial and home spaces.

Specifications:

- Natural finish.
- Pads with rounded corners.
- Manufactured as designed (upper side).
- Reverse side is provided with antiskid layer (antislip lacquer).
- Formatting to your requirements.

Advantages:

- Material harmless to health.
- Highly durable.
- Perfectly protects the floor and furniture against scratches and damage.
- Easy to clean.
- Safety for you (rounded corners, anti-slip layer).
- UV stable.
